

## PRICING

Good price of the share for Deutsche Telekom AG (DTE.DE), which makes it easier to invest with low capital in comparison with T-Mobile, where the price per share is more than \$140.

ETF-grade bonds are good for securing your investment and can be easily used by conservative investors. They are not expected to have extremely high returns but offer stable and safe returns. They are good for diversifying your risky instruments.

## Quality

The portfolio has good quality since it includes low-risk instruments, even for shares. The company in which investments are made has a strong financial position and regularly pays out dividends.

ETF-grade bonds are well diversified and have low risk.

## Innovation

In our unstable and developing world, investing in companies that develop IT and communication can be a wise decision. By doing so, you become part of connecting people and companies with each other. With a financial safety buffer, such as ETF-grade bonds, you can manage risks more confidently. So, do not be afraid of risks and seize the opportunity to invest in the future of connectivity and technology.

## PORTFOLIO B

**Every plan A, should have plan B**

**01**

**Deutsche Telekom AG (DTE.DE)**

The largest telecommunication company in Europe

**02**

**ETF of investment grade bonds**

Bonds are often used to secure investments, as they are more easily tradable and possess higher credit ratings, making them less risky during economic downturns.
